COMPANY INTRODUCTION

1. Introduction

DNIEPER GROUP – Industrial Quality Services

Established in 2015 in Sharjah, UAE, **Dnieper** has gained an excellent track record in delivering mission critical solutions across the Oil & Gas industry and their ancillary sectors as per the highest Marine and Offshore Oilfield Standards and high rise structures.

Dnieper is active in more than **17 countries worldwide** including major industry hubs in Europe, UAE, Saudi Arabia, Oman, Qatar, Kuwait, China, Russia, Kazakhstan, India, Pakistan, South Korea, Singapore, Thailand, Malaysia, Nigeria, Cameroon and further growing to enhance the availability, efficiency and value of our services for all our esteemed customers.

Our highly qualified and experienced professionals have an outstanding **safety track record** and are well known for their hard and reliable work towards set-out project goals, so our clients benefit from such important advantages as **enforcement of quality targets, training & certification, lead time reduction, savings of project costs and prevention of project risks**.

We are keen on supporting you in your projects and invite you to an exciting journey through our product & service portfolio. Contact us today for further details and deployment of our solutions for your benefit.

Dnieper Industry Services stand out from others as we provide solely experienced professionals, who have already proven themselves and whom we additionally train and develop in our Group in a sustainable long term approach. As result our entire team has an outstanding safety track record and is well known for commitment and their hard and reliable work towards set-out project goals.

All our technicians are industry insiders and, regardless of their individual profession and designation, understand not only their work but also the client and the job requirements – both important factors for work efficiency and the overall project success.

Our clients directly benefit from the exceptional know-how and experience of our employees in a safe and rewarding working environment. We are proud that various well known International Oil & Gas Industry Corporations utilize and rely on our Dnieper Quality Services.

Dnieper has successfully established its subsidiary for other industrial services into Oil and Gas and Constructions.

Petronext International LLC

Dnieper Fire & Safety LLC

Brief Portfolio

Dnieper Middle East Is a professional industrial solution provider, offering high quality engineering, procurement, construction, commission and project management services to Oil, Gas, Petrochemical, Process, Power and Water Industries. Our sphere of activity is focused in providing total turnkey solutions & expertise to clients through out Indian Sub Continent, MENA, Africa, APAC, America and Australia.

Dnieper commenced its operations in year 2015 to inspect and evaluate the technical condition of oil and gas plants and related items. Since then, our core competence has been to identify, assess, and advise on how to manage risk. Whether we inspect a plant, equipment, material or certify a company's management system, or advice on how to do proper welding or preventing corrosion or detecting flaws, our focus is to safely and responsibly improve business performance.

Over the past decade, through its commitment towards greater endeavor, Dnieper have created an outstanding distinction from its core foundation Engineer ! Procure ! Construct ! Commission ! Planning ! Reliability ! Innovation ! Determination and Excellence. Since its establishment, the group has earned a strong reputation of being the most reliable, progressive, and dynamic EPC solution provider.

OUR TEAM

We aim to be the most competitive and the most productive service organization in the world. Our core competencies in inspection, verification, testing and certification are being continuously improved to be best-in-class. They are at the heart of what we are. Our chosen markets will be solely determined by our ability to be the most competitive and to consistently deliver unequalled service to our customers all over the world.

Electrical Installation Inspections & Integrity Certifications

Asset Integrity Management from Dnieper – Maintain your asset in a fit-for-service condition through an effective asset management program that ensures reliability, technical integrity, safety and regulatory compliance.

Ensuring the technical integrity, safety, and reliability of your facilities and equipment is a priority. However, with increased operating costs and limited resources, implementing a fully compliant asset integrity program can be challenging. Our asset integrity management service can help you maintain your asset, and ensure fitness for service, reliability, safety and compliance with all relevant regulations.

Why use asset integrity management services from Dnieper ?

We can help you:

- Establish an effective asset integrity program that adheres to all relevant regulations and safety standards
- Improve the technical integrity of your assets, and identify and eliminate risks
- Maintain your asset, and ensure fitness for service, safety and reliability
- Extend the remaining life of your asset in the most reliable, safe, and cost-effective way possible

As the world's leading inspection, testing, verification and certification company, we offer you unrivaled expertise, experience and resources. That is why we are the first choice for clients requiring effective asset integrity management programs the world over.

Wherever your asset is based, we can tailor a solution to fit your needs, with experienced staff and a global reach, we can help you achieve your inspection, engineering, data management and safety goals.

Our asset integrity management programs include:

- Development management
- Implementation
- Gap analysis

Contact us today to find out how our services can help you implement and manage a fully compliant and effective asset integrity management program.

Amusement Rides & Theme Parks Certifications

Amusement Rides Inspections

Dnieper offers Rollercoaster NDT Inspections according to the popular industry standard. Our industrial rope access division inspectors maintain high standards and hold other certifications in advanced NDT and/or engineering.

The ability to inspect and maintain rides and other attractions in an efficient manner is a commitment. Our skilled professionals use the latest equipment and technology available to assist in completing your NDT inspections and to insure that you experience as little downtime as possible. According to the ASTM, a visual inspection by a qualified technician is one of the fastest and easiest ways to spot potential issues in high use, high impact equipment. Having regular visual inspections by one of our skilled technicians is just one way to lower your costs and ensure that your equipment is in peak operating condition. Our rope access division offers safe, accurate, and cost effective testing and inspections designed to limit down time and have a minimal impact on the operations at your facility.

Amusement Rides & Devices Inspection

Quality Assurance

Our QA inspection and integrity verification program continually monitors our rides and devices equipment and observes our technicians' safety practices on an ongoing basis. We adhere to the ASTM E2505-07 standard, which is the Industrial Rope Access Standard. We strive to offer everything you need to stay compliant and protect the safety of your guests while reducing the amount of downtime experienced. Our current offerings are designed to be cost effective and provide a proactive approach to safety and include:

Amusement Ride Evaluations:

- Track and Rail Inspections
- Structural Steel Inspections
- Wire Rope
- Bolt
- Fasteners and Connectors
- Axles
- Bogies
- Pivots
- Lap Bar Parts
- Failure Analysis

Testing and Inspection Applications:

- Visual Inspections (VI)
- Magnetic Particle Testing (MT)
- Liquid Penetrant Testing (PT)
- Ultrasonic Testing (UT)
- Ultrasonic Thickness Testing (UTT)
- Eddy Current Testing (ET)
- Industrial Radiography (RT)
- Computer Digital Radiography
- In - situ metallographic

Contact us to learn more about your Rollercoaster NDT inspection options and what we can do to improve safety and lower costs at your facility.

Non-Destructive Testing

RIGHT SERVICE — MAXIMUM RETURN

Whether it is in fabrication, pipe manufacturing, pipeline, plant construction, chemical, petrochemical plants, shipyards or offshore industry, in conventional and nuclear power plants - our non-destructive testing services provide quality assurance and process safety.

DNIEPER has a world wide track record with proven performance on new construction, pipeline installation, in-service inspection and expansion projects as the total NDT solution provider.

DNIEPER' scope of services covers both, conventional and advanced NDT systems, provided by qualified inspectors to international standards. DNIEPER understands better than most that the excellence of any service commences with quality and the implementation of detailed and effective inspection procedures, state-of-the-art equipment and most of all our professional people.

DNIEPER' fast growing network of NDT inspectors is suitably trained, multifunctional and prepared to be available whenever our ser-

vices are required. DNIEPER creates added value to your business by applying improved technologies, looking for the fastest inspection methods, integrating our workforce into your daily activities, combining technologies and carefully listening to your needs. When you need to save overall costs, improve quality and want to be sure of reliable production or operating processes, NDT is the toolset you need. In every stage of the life cycle of your assets DNIEPER can contribute with added value NDT services.

CREATING ADDED VALUE WITH INTEGRATED NDT

Integrated NDT to DNIEPER means seamless cooperation with your organization to help you to get the best out of your processes and correct any deviations from your desired standards before they lead to non-compliance. DNIEPER will supply all necessary data for Asset Integrity Management (AIM) programs, Integrity Services, and Risk Based Inspections.

DNIEPER offers a fully integrated service pack combining conventional NDT, advanced technologies, inspection and

AIM. You will be provided with KPI's to effectively manage your assets. All field inspection coordination and data management can be handled by DNIEPER.

Integration also means we will challenge your service requests when there is room for improvement in terms of costs and or quality. You can count on DNIEPER when you need to control and improve process safety and reliability. DNIEPER provides the correct NDT techniques to locate and size defects in your assets, and this will lead to the

highest reliability of your assets.

DNIEPER trains and certifies NDT Inspectors all over the world to support and protect your assets including production, processing plants, piping systems, pressure vessels and other process related equipment. By integration and setting the same requirements for inspection personnel and systems throughout the life time of your assets you get the most safe and reliable operations.

PROTECTING YOUR ASSETS THROUGHOUT **THEIR LIFE CYCLE**

* DESIGN

Already in the design phase it is important to select relevant inspection codes and levels that need to be met in future. In this stage you need to make sure NDT can be applied to your design to prevent future (monitoring) problems. DNIEPER provides the most up to date NDT consultancy services in order to determine the most efficient inspection technologies stretching your design limits.

* PROCUREMENT

During procurement a lot of NDT is required. The professional DNIEPER network ensures the services in your home country are the same as the ones provided at the other side of the globe. DNIEPER will verify the materials used and certificates supplied. DNIEPER can perform 0-measurements in a stage where all components are still accessible. DNIEPER also audits first party NDT results and reviews any NDT procedures.

* OPERATION

Once in operation you will need the highest quality NDT inspection services to ensure reliable and safe performance. Advanced NDT will support you saving costs and minimize intrusive inspections as much as possible. Our local approach ensures we speak your language and advise you on the best practices. Aligning the same level of quality in the procurement, installation and operation stage can prevent unplanned failures which can affect production.

* INSTALLATION

During the installation phase NDT supports the welding processes and ensures that specifications are met. Our wide range of services allows us to select the most appropriate and efficient technologies. Therefore, we can assure that you meet your schedule. In this stage typically first preparations should be made establishing an Asset Integrity Management System or to integrate the NDT results into your existing systems.

Inspection & Annual Maintenance Contract of your Fire-Fighting Systems

We could be of help by serving you with an Annual Maintenance Contract (AMC) or Inspection to identify that your system works fine in case of any emergency. You could avail our services **24/7 for an AMC with the assurance of quick response and responsibility.**

As a part of the AMC, we take over your existing system and closely monitor all crucial elements including Fire fighting, Fire alarm, Emergency Lighting, Voice Evacuation and Gas suppression system. AS part of the AMC, we also help our clients with the necessary documents, clearances and periodic certifications that are required to install and maintain their fire fighting systems.

Dnieper comprises of a group of trained individuals, who make sure that all your life-saving products are working optimally. They do this through regular checks and update all your devices. A quarterly report is sent to you so that you know the status of your system. All in all, Dnieper make sure that your equipment is ready to perform when you need it the most.

Why only authorized AMC

At Dnieper, we are producing life-saving devices with passion and precision. We are the best equipped to maintain them. This is why the law dictates that all must be serviced and maintained only by authorized personnel.

Dnieper AMC Package

Dnieper technical team is a group of skilled, trained engineers & technicians who undertake a Quarterly Service Schedule for AMC customers to ensure that every equipment in the client's premises is always working optimally.

All inspection and AMC are taken and delivered in accordance with national & International standard (NPFA & UAE Civil defense).

VISION

To become customer's first choice as a local one stop solution provider for best class certified products and services of premium quality that meets a varied range of fire and safety application.

MISSION

Become a global leader having domestic presence with a credible and trustworthy profile of high standard and world class installation and maintenance services.

Dnieper Fire & Safety division is a leading Fire Protection, Engineering, Supply and service Company offering a **"one stop shop"** for client's system solutions and equipment needs. The Company's facilities are based throughout the UAE with branches in Abu Dhabi and Sharjah. A wide customer base is covered in all major market sectors. Dnieper Fire & Safety operates Gulf wide, with representation in key areas throughout the MENA region.

ENGINEERING & MANPOWER

Dnieper, offers range of engineering services suits at various sectors. Having decade of experience in as below Dnieper keeps the excellent track record against positive delivery

As a company we pride ourselves on our ability to effectively balance our knowledge of working with a sensitivity to local experience, environment and culture. Our aim is to produce bespoke design solutions for all our projects.

We offer services across the following sectors:

- Planning & Urban Design Development
- Architecture
- Civil Engineering
- Mechanical Engineering
- Electrical Engineering
- Structural Engineering
- Interior Design
- Project & Construction Management
- Contracts & Quantity Surveying
- Design review and approval
- Structural design
- Drawing development (Fab/Erection)
- Static calculation (civil and foundation)

Technical Training & Certifications

Dnieper provides wide range of disciplines - in conventional technical trainings and specialist NDT processes and other advance training & certifications at our United Arab Emirates offices (UAE).

All of our training is provided by a team of fully qualified staff, all of whom have industry experience. We can supply training to a wide range of industry sectors including oil, gas, power and chemical.

Our training is in accordance with European, international and American standards such as ASNT or PCN.

Our NDT training courses include:

ASNT Levels I, II training for:

- Magnetic particle inspection
- Dye penetrant testing
- Radiographic testing
- Ultrasonic testing
- Visual testing
- Acoustic emission
- Thermograph
- Leak testing

Other than NDT we offer following training & certifications.

- ♦ **CSWIP 3.1 & 3.2 (Training & Examination)**
- ♦ **BGAS**
- ♦ **NEBOSH**
- ♦ **IOSH**
- ♦ **Fire Safety**
- ♦ **First Aid**
- ♦ **Safety Diploma**
- ♦ **And many more**

More specialist NDT courses are available in phased array, time of flight diffraction, thermography and acoustic emission. We also offer bespoke training to meet your company's individual needs.

Our training is based on practical exercises and backed up by classroom teaching in accordance with the stipulations of international standard training requirements.

Courses are conducted at our training center in the United Arab Emirates, which are equipped with lecture rooms and practical facility for real time-exercises. Alternatively, training can be delivered at your company's premises.
